
EOS Draft-Proofing Work Parties

Get some friends together and get ready to draft-proof your house. You can save money, energy and enjoy a cozier home this fall and winter!

EOS draft-proofing parties bring friends together to learn how to seal air leaks from a certified energy advisor. Work together to draft-proof your home during a **FREE** 3-hour party! **EOS provides all tools, materials and party food.** This program is open to all residents in Tantramar but gives priority to those with lower incomes and/or non-electric heat. Program runs until winter 2020.

Find the registration form at
www.eosecoenergy.com/en/party

Can't host a draft-proofing party but still want to draft-proof your home? Try some of these suggestions to save energy around your house!

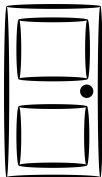

Check the windows in your house and be sure to replace any broken or cracked panes. You can use caulking to fill in gaps around the frame. If you'd like to further weatherize your windows, tape a piece of plastic to the inside of your windows to help insulate them.

Examine the baseboards, closets, walls and the foundation of your home. If there are gaps, use caulking or spray foam to seal holes.

If you have a fireplace or flue that is not in use, consider using a draft-excluder to help reduce escaping heat. Place foam gaskets behind sockets and switches.

Check your door frame for gaps or drafts. A door sweep can be easily installed to help reduce drafts under the door and weatherstripping can be placed around the frame to close gaps.
