

Why Collaborate

Climate change adaptation is a complex endeavour and collaboration is the key to success. There are many reasons to collaborate on climate change adaptation projects:

- Networking
- Learning together
- Sharing the same understanding
- Using the same vocabulary
- Building trust

- Sharing resources
- Partnering on projects
- Can make progress faster
- Communicate more easily
- Relationship building
- Better decision making

The Chignecto Isthmus is the narrow strip of land that connects New Brunswick to Nova Scotia:

Chignecto Climate Change Collaborative

History

The award-winning and internationally renowned Chignecto Climate Change Collaborative (formerly the Tantramar Climate Change Adaptation Collaborative) first formed in January of 2013.

Climate change adaptation is a large and complex issue, too big for one community to address alone. Thus, there was a need to come together and address climate change adaptation in a collective, coordinated fashion – with communities in the Chignecto region, on both sides of the New Brunswick- Nova Scotia border.

The CCCC holds an annual workshop to learn more about adaptation issues including local sea level rise, emergency measures, salt marsh restoration, the state of the dykes, education and outreach activities, and much more.

A regional adaptation plan was developed in 2013 and is updated every five years (see website).

EOS Eco-Energy coordinates the CCCC.

Who We Are

The Collaborative working group includes representatives from the following organizations:

Vision

The CCCC envisions the Chignecto region being resilient to climate change.

Mission

The CCCC works collaboratively to advance regional adaptation activities across the Chignecto region of New Brunswick and Nova Scotia.

Initiatives

- Oversees and advances the Chignecto Region Adaptation Plan
- Coordinates annual workshops for Collaborative members, the public and youth on topics such as sea level rise, the dykes, flood risk reduction, emergency and storm preparedness, infrastructure & retreat, and more.
- Storm Prep Tantramar Facebook Group
- Educational sea level rise signs and markers
